When Does Appointment-Scheduling Complexity Pay? Service-Time Uncertainty and the Value of Simple Planning Rules

Author: Onishi Tatsuki [AUTHOR TO CONFIRM name order and romanisation]

Affiliation: Data Science and AI Innovation Research Promotion Center, Shiga University, Hikone, Shiga, Japan [AUTHOR TO CONFIRM — taken from the author block supplied for another manuscript]

Corresponding author: Onishi Tatsuki, e-mail: [AUTHOR TO PROVIDE]; ORCID: 0000-0001-7261-9062 [AUTHOR TO CONFIRM]

Word count (main text, excluding abstract, references, captions): 3467

Declarations

Funding. [AUTHOR TO COMPLETE — no funding statement has been invented; enter also in Editorial Manager.]

Competing interests. [AUTHOR TO COMPLETE — no statement has been invented.]

Ethics approval and consent to participate / publish. Not applicable: the study uses only computer-generated service times; no human participants, patient records or other human data were used. [AUTHOR TO CONFIRM]

Data and code availability. All results, figures and tables are generated by the publicly available simulation code and configuration files at https://github.com/bougtoir/tailaware-outpatient-scheduling, commit 20b691aa2b04eeb45db7b099cccff457b849a8c2, which was reproduced from an anonymous fresh clone. No clinical data were used. [AUTHOR TO CONFIRM; repository licence is an open author decision]

Use of AI tools. Simulation code, analyses, figures, tables and manuscript drafts were developed with the assistance of an AI software-engineering agent (Devin, Cognition AI) under the author's direction; the author checked the code, numerical outputs and text and takes full responsibility for the content. No AI tool is listed as an author. [AUTHOR TO CONFIRM extent and add any other tool used]

Author contributions. [AUTHOR TO CONFIRM, e.g. CRediT: Onishi Tatsuki — conceptualization, methodology, software, formal analysis, writing.]

Acknowledgements. [AUTHOR TO COMPLETE or delete.]
